Using ReaDI-Watch to Manage Grant Supported Projects in Real-Time

22/04/2025 11:13 am IST

In the dynamic world of Innovation and R&D, the ability to track and manage grant-funded projects in real-time is a critical skill. This is especially true when it comes to meeting tight technical, financial, and labour allocation reporting requirements.

Grant-funded projects often come with a unique set of challenges, including strict budget constraints, rigorous reporting requirements, and the need for precise labor allocation. These projects require a level of oversight and management that can be daunting, but with the right strategies and tools, it is possible to effectively manage these projects in real-time.

ReaDI-Watch Platform and Grant-Funded RD&I Projects

This article aims to provide a guide on how to navigate the complexities of managing grant-funded projects, using the ReaDI-Watch Platform.

We will focus on optimizing real-time project management, focusing on how to meet reporting requirements for the following criteria:

- **Technical or Technological Progress Reporting**
- **Financial Tracking & Reporting**
- **Labour Allocation (Timesheet) Tracking & Reporting**
- **Commercial Progress Reporting**

ReaDI-Watch has been used to manage and track a range of Innovation and R&D grant funded projects across Ireland, the UK and Canada. Some of the funding programmes / organisations our customers have tapped into and managed in real-time include:

Ireland

- Enterprise Ireland RD&I Fund
- Disruptive Technologies Innovation Fund
- Agile Innovation Fund

UK

- Funded programmes through UKRI (InnovateUK)

Europe

- European Innovation Council (EIC) Accelerator
- EIT Digital
- EIT Health

Canada

- Mitacs
- IRAP

Though the eligibility requirements, specific templates & types of activity funded differ across these organisations and grant funding programmes, ReaDI-Watch offers a balance of structure and flexibility, to meet requirements across these grant funding supports.
