

ReaDI-Watch at Kuka Robotics 10-Year Innovation Celebration

24/04/2024 10:20 pm IST

Prof. Gerry Byrne, the co-founder and Chief Scientific Officer of ReaDI-Watch, recently attended a significant event that marked a milestone in the world of automation and robotics. The event was none other than KUKA Ireland's 10th-anniversary celebration.

A Celebration of Growth and Innovation

KUKA, a global leader in automated technologies, celebrated its [10th anniversary](#) in Ireland on March 11, 2024. The event was a grand celebration of growth and innovation, reflecting upon a decade of successful operations in Ireland. It also served as a platform to delve into the realms of digitalisation and the factory of the future.

Prof. Byrne's Participation

Prof. Byrne's participation in this event was not just as an attendee but as an active participant in the discussions and networking sessions. The event provided Prof. Byrne with valuable insights into the latest advancements in automation and robotics. It also offered an excellent opportunity for networking with industry leaders and innovators.

As ReaDI-Watch embarks on its journey to change the way companies invest in R&D and Innovation, events like these provide the perfect opportunity to stay abreast of the latest trends and developments in the industry.
