

# ReaDI-Watch at the Irish National Manufacturing & Supply Conference 2024

29/05/2024 12:31 pm IST

ReaDI-Watch participated at the **Irish National Manufacturing & Supply Chain Conference** at the RDS in Dublin. This conference is a significant event in the manufacturing and supply chain sectors, bringing together industry professionals from various fields.

## Conference Overview

The conference provided a platform for attendees to engage in discussions, attend sessions, and network with professionals from diverse backgrounds. It was an opportunity to gain insights into the current trends and future directions of the industry.

Topics included: Industry 4.0, 3D Printing, Digital Manufacturing, Smart Factory, Lean & Continuous Improvement, Robotics & Automation, Industrial Blockchain, Research & Development, Precision Engineering, QEHS, Supply Chain & Logistics, Sustainability, Food & Beverage Engineering, Pharmaceutical and Life Sciences, Reliability, Maintenance & Asset Management, Procurement, Government Policy and Industrial Strategy, Exports, Skills & Training and much more. The manufacturing sector employs 260,000 people and plays pivotal role in global supply chain from engineering to computers and medical technologies.

## ReaDI-Watch's Participation

Team ReaDI-Watch had a busy event, showcasing our products and solutions to the attendees, networking with connections & meeting new people in the space. The event was a strong platform to learn about Ireland's latest innovations in the field of manufacturing and supply chain.

## Insights and Future Directions

The conference offered valuable insights into the manufacturing and supply chain sectors, which will guide our strategies and initiatives in the future. We are committed to integrating these learnings to drive innovation at ReaDI-Watch.

We would like to express our gratitude to the organizers for hosting this event. We look forward to participating in the next year's conference.

Stay connected with ReaDI-Watch for more updates on our ongoing projects and innovations in the manufacturing and supply chain landscape.
