ReaDI-Watch at Ireland's Inaugural Disruptive Technologies Summit 2024

ReaDI-Watch was thrilled to participate in Ireland's first-ever Disruptive Technologies Summit, held on September 20, 2024. This landmark event, organized by the Department of Enterprise, Trade and Employment, aims to foster collaboration between enterprises and researchers on groundbreaking technologies that promise to reshape industries and drive economic growth.

Declan Hughes, Secretary General of the Department of Enterprise, Trade and Employment with Professor Gerry Byrne, Co-founder and Chief Scientific Officer of ReaDI-Watch Ltd. at the Enterprise Ireland DTIF DisrupTech event in dublin Castle, 9th September 2024.

A Platform for Innovation

The Disruptive Technologies Summit is a unique gathering that brings together innovators, industry leaders, and academic researchers to explore and discuss the latest advancements in technology. The summit's primary goal is to encourage partnerships that can lead to the development of game-changing solutions across various sectors, including healthcare, manufacturing, and environmental sustainability.

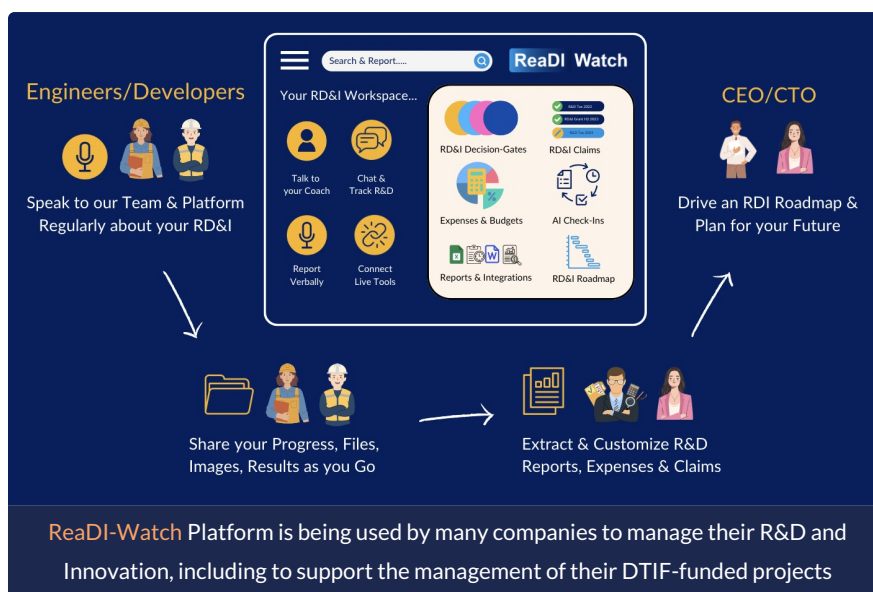

ReaDI-Watch's Role

As a leader in R&D and Innovation management solutions, ReaDI-Watch is excited to showcase its cutting-edge platform designed to revolutionize how companies manage their research and development processes. Our platform leverages artificial intelligence to provide real-time, interview-based R&D reporting, ensuring that data is current, accurate, and actionable.

At the summit, ReaDI-Watch presented its latest innovations and demonstrate how our AI-assisted infrastructure can help organizations streamline their R&D activities, reduce risks, and enhance overall productivity. Our team also participated in discussions and networking sessions, sharing insights on the future of R&D management and the role of AI in driving technological advancements.

Key Highlights

- **Real-Time Data Capture:** Our platform uses AI to transcribe and analyze interviews, capturing data in real-time and eliminating the delays associated with traditional reporting methods.
- **Structured Data Collection:** By employing a structured interview format, we ensure consistency and accuracy in the data collected, making it easier for R&D teams to focus on innovation rather than paperwork.
- **Enhanced Collaboration:** The summit provides an excellent opportunity for ReaDI-Watch to connect with other innovators and explore potential collaborations that can lead to the development of new technologies and solutions.

ReaDI-Watch Platform is being used by many companies to manage their R&D and Innovation, including to support the management of their DTIF-funded projects. Read a case study below!

Equal1 - developing revolutionary quantum servers with unmatched performance, affordability, and energy efficiency

Looking Ahead

ReaDI-Watch is committed to driving innovation and supporting the development of disruptive technologies that can transform industries and improve lives. Our participation in the Disruptive Technologies Summit underscores our dedication to staying at the forefront of technological advancements and fostering a collaborative ecosystem for R&D.

We look forward to engaging with fellow innovators and contributing again in the future to the vibrant discussions at the summit. Stay tuned for more updates on our journey and the exciting developments that lie ahead!
