

Cutting-Edge Vision Systems for Retail

10/10/2024 1:08 pm IST

Founded in 2019 by David Owens and Piotr Gospodarczyk, Everyangle is a pioneer in software and vision systems. Their platform utilizes computer vision and CCTV to help retailers minimize losses, enhance operations, and obtain valuable in-store data. Based in Ireland, with offices in the UK and America, EVERYANGLE is leading the way in visual technology solutions.

With a small team focused on software development and client acquisition, Everyangle needed to enhance their R&D capabilities without compromising their technical and commercial efforts.

They set three clear objectives:

- develop internal RD&I team capability to capture RD&I in real-time
- secure funding for RD&I qualifying projects, and
- create a detailed roadmap for their computer vision software solutions.

Everyangle has leveraged ReaDI-Watch's Innovation Management service and platform, to capture R&D activities in real-time, improving decision-making and resource allocation. Through ReaDI-Watch's support, Everyangle has been able to complement its €2.9 million equity fundraise (in 2023) with significant R&D tax credits, empowering further R&D projects and enhancing cash flow in the business.

In addition, using ReaDI-Watch's Core Technologies approach, Everyangle have developed a comprehensive roadmap for their computer vision solutions, facilitating strategic alignment and resource planning.
