

Elevate Festival 2026: Building ReaDI-Watch in Canada

07/10/2026 4:43 pm IST

Elevate Festival 2026

Elevate Festival brings together founders, technology companies, investors and members of the wider innovation ecosystem in Toronto.

The event provides opportunities for companies to showcase their work, meet organisations from across different sectors and build connections within Canada's technology and innovation community.

ReaDI-Watch attends Elevate Festival 2026

ReaDI-Watch attended Elevate Festival as part of our continued engagement with the Canadian innovation ecosystem and to introduce our work in R&D and innovation management to organisations attending the event.

The festival provided an opportunity to meet companies and professionals working across medical technology, engineering, manufacturing, health, software, investment and other areas of the Canadian innovation ecosystem.

Taking part also provided useful insight into the different ways organisations engage with new technology and approach research and innovation as they grow.

The event provided ReaDI-Watch with new connections across companies, investors and the wider ecosystem, while helping us continue to develop our understanding of the Canadian market as we build our presence in Canada.
